Pottery Workshop at BFA Studio attracts a lot of students' interest

The Office of Student Affairs organised a pottery workshop in the BFA studio. While we all know the benefits of clay-making, an article investigating the therapeutic benefits of clay work in Art Therapy: Journal of the American Art Therapy Association points out, "clay-work makes possible an entire non-verbal language or communication for the creator, through which his or her mental realm, emotional life, and primary object relations can be expressed."

The event was a huge success, with students from all across the institution pitching in and trying their hands on various forms of pottery. It was a day-long event with over 1,000 participants.

"Pottery's tactile sensation may be contemplative in nature, but it invokes a deep sense of relaxation and well-being," says Dhvani Goyal, a student who took part in the workshop, adding that, "we have enjoyed the session and we request the management to organise similar events on monthly basis."

Aperture showcases photographic marvels

Photos by: Aperture

The Students of Aperture: The Photography and Creative Culture Society of JGU, held their bi-annual exhibition 'Aperture Alley'. This exhibition was a creative showcase of the photographic marvels created and curated by the members of the JGU society.

The name 'Aperture Alley', while keeping in touch with the clichés surrounding photography, also went to the very root of the execution of the event. While the photographs

were a predictable stroll down an alley of memories, the event design was such that it took the observer to a literal alley. The cordoned-off area, continual thread of frames like larks on a moss-covered branch, and the interactive spirit, all took the numerous viewers to the streets of Kala Ghoda, where the perspectives of the artists were displayed alongside that proud, long-standing institution named the Jehangir Art Gallery.
